

CenterLight Healthcare, formerly Comprehensive Care Management (CCM), is an innovative managed care organization that excels in providing long-term healthcare services throughout the New York area.

Their goal is to help older adults, the chronically ill, disabled individuals and others they serve to enjoy the highest possible quality of life while living safely in their homes and communities. They came to us for a canopy that would serve two purposes: branding and safety.

The canopy provides their customers safety and protection while being transported to and from the facility. They also wanted their brand to be more recognizable from the outside of the building.

We sat down with Centerlight to discuss their current business' branding. We matched the colors exactly and were able to successfully achieve the look and feel that they wanted.

## St. Barnabas Emergency Department

St Barnabas Hospital in Livingston, NJ, needed a new awning for their emergency room entrance. It needed to provide shelter for ambulance workers and patients.

## General Hospital Walkway

General Hospital in Manhattan needed a complex system of awnings to protect patients and staff from the elements as they traveled between buildings. An additional challenge was the tight quarters.

## Improving Patient Experience

The right awning can help put your patients at ease, promoting your facility's commitment to caring and personalized treatment. Providing protection from sun, snow, and rain on walkways, at doorways, ambulance entrances, and mobile MRI locations is just one more way to show patients how much their comfort means to you. Wind barriers on double doors make an entry way peaceful and inviting. Custom-designed shade systems combine privacy with distinctive marketing opportunities. Our OSHA-certified installers ensure every awning is securely mounted so it stays safely in place.

## Made to Stand Up to Northeast Winters

Freezing temperatures, harsh winds, pollution, sand and salt air, as well as summer's hot sun can take a toll on your awnings. Maximum durability depends on use of the right materials and skillful engineering – and we provide both! Materials, angle of installation, even stitching and choice of printing ink can make all the difference. Our awning specialists take all of this into account when recommending the best solution for your hospital or healthcare facility.

## Time for a Fresh New Look or a Rebranding?

Make sure your new look makes a great first impression with the right awnings.

Consistency in design, graphics and colors is critical, but your new awnings must also make your facilities look welcoming and appealing.

Dealing with architects, construction teams, marketing and facilities managers – all of whom have a say in your new look can be cumbersome and stressful. Our awning experts have done this before! They'll work with you to save time and ensure that everyone is pleased with the results. They'll also make sure your awnings meet local regulations.

## Making Your Vision a Reality

Whether you're starting from a vague idea or a set of engineering drawings, our awning experts will join you at any stage of the design process. Providing initial creative design assistance, full-color autoCAD engineering drawings and custom fabrication in state-of-the-art facilities using the latest high-tech equipment, we finish up your project using only OSHA-certified installers to ensure your awning will remain secure and sturdy. Along the way, we can provide valuable industry-specific insights into functional and aesthetic considerations.

Because we understand that many healthcare organizations have complex decision-making processes, we'll coordinate with the numerous departments and individuals who need to be kept in the loop. We can even assist with local permitting if needed. It's our goal to be your partner in your project. We've done this before! A call to Capitol Awning is the only one you need to make for your hospital awning project.
